

10 SECOND OVERVIEW

- Profit from our outstanding expertise in microarray and next generation sequencing based genotyping
- Work with a partner who can deliver genotyping results for ten thousands of samples per week
- Select from our broad Genomics portfolio the right throughput, best quality level and the most suited platform for your special needs
- Let a dedicated project manager support your project
- Expect "Made in Europe" at best price

GENOTYPING SOLUTIONS

Get your data always fast
and reliable

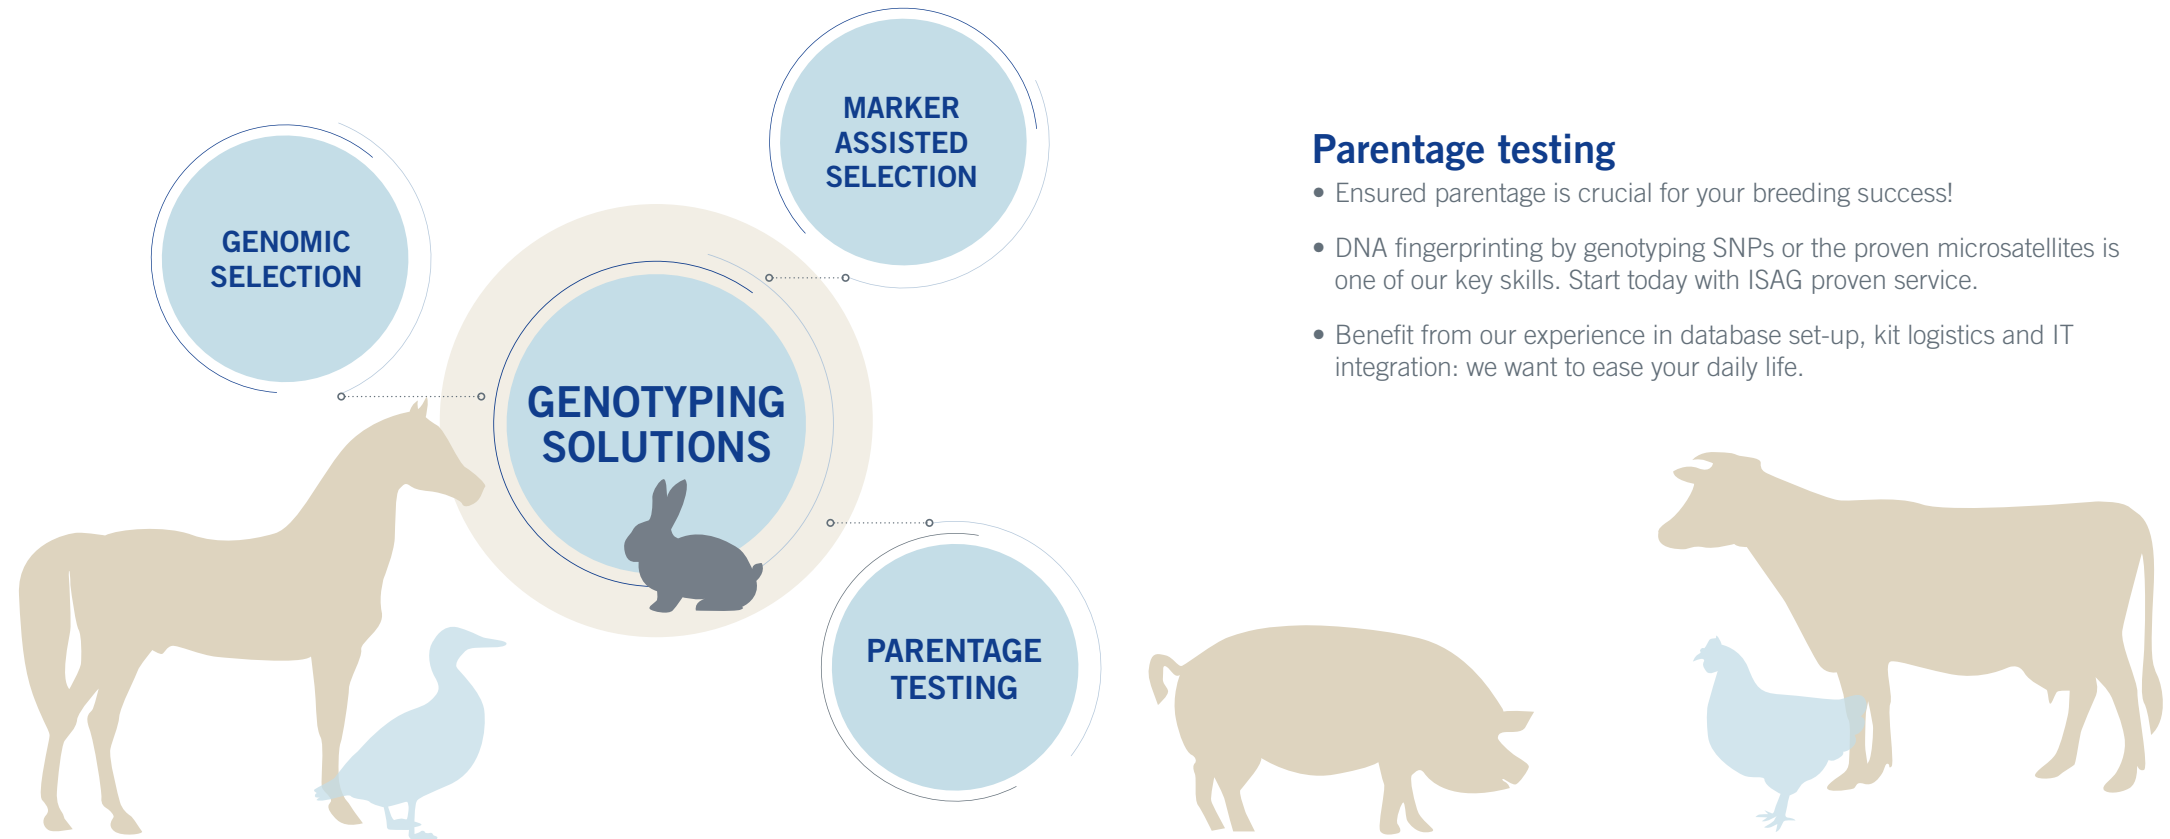

WE COVER ALL YOUR GENOTYPING NEEDS

Genomic Selection

- Benefit from our leading capacity with 10,000 samples per week for both Illumina and ThermoFisher microarray genotyping services for your routine testing.
- We guarantee high-speed, reliable TAT and you can analyze more samples for your limited budget.
- Be ahead of the competition and use your own SNP panel. We help you in SNP discovery and coordination with the array providers.

Marker assisted Selection

- No matter whether you integrate 1, 100 or 500 markers in your breeding strategy we can deliver you the data in very short time and with highest accuracy.
- Our NGS or qPCR based genotyping solutions are robust, flexible and delivers you the data you need for very low costs.
- Discuss your needs with us and be surprised of our outstanding offer

Parentage testing

- Ensured parentage is crucial for your breeding success!
- DNA fingerprinting by genotyping SNPs or the proven microsatellites is one of our key skills. Start today with ISAG proven service.
- Benefit from our experience in database set-up, kit logistics and IT integration: we want to ease your daily life.
