Solutions

Strong Expertise

Outsource Your Upstream Process for Guaranteed Compliance and Scalability to Our Gene Synthesis Team

Flexible and tailored upstream support for scale-critical steps.

Whether you need DNA templates for your IVT mRNA synthesis, highly standardized plasmid preps for your diagnostic kit, or large-scale colony picking in your antibody screening workflow, we step in where it matters. Maintain in-house control over selected stages and let us do the rest.

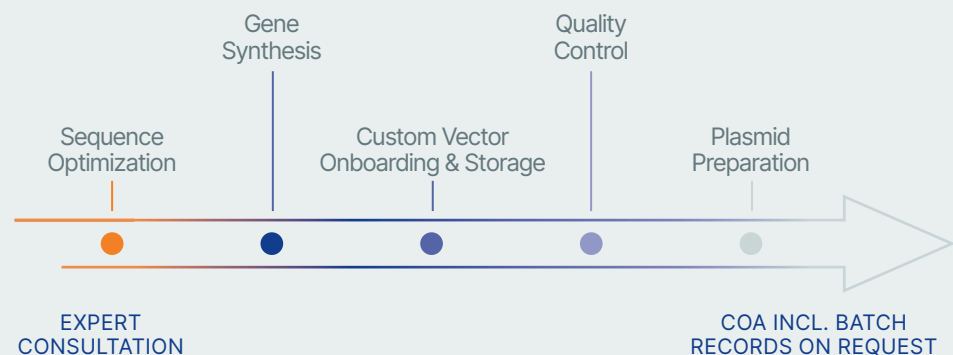

Who This Is For

- mRNA Therapeutics & Vaccine Developers
- Antibody Screening & Discovery Teams
- Diagnostic Kit Manufacturers
- Many More
