Sanger Sequencing tailored to your specific needs

Choose us for precision, compliance and reliability

Eurofins Genomics' GLP-compliant and ISO 17025-certified Sanger sequencing services provide pharmaceutical companies, vaccine developers, and research teams with precise, reliable sequence verification.

Our experts support preclinical workflows, strict QC requirements, and challenging sequence verification tasks. Our services accommodate a broad range of template types, providing unique flexibility for diverse applications. With GLP compliance and alignment with GMP supplier expectations, we ensure the documentation quality and process transparency for regulated development.

Production Process & Quality Control

	ISO 17025	GLP
Quality control of incoming DNA	✓	✓
Design and synthesis of specific primers	✓	✓
Evaluation of sequencing results	✓	✓
Bioinformatic analysis	✓	✓
Verification accuracy up to 99.99999 %	✓	✓
Study inspection by QA	✗	✓
Storage of template DNA / primers	✓	✓

Documentation

	ISO 17025	GLP
Certificate of Analysis (CoA) or comprehensive report	✓	✗
Detailed ISO-compliant documentation	✓	✗
Preparation of study plan	✗	✓
Advanced, highly detailed documentation (project specific)	On demand	✓
Study report incl. GLP compliance statement	✗	✓
Quality assurance statement	✗	✓
Storage / archiving the data and documentation	10 years (storage)	15 years (storage)
