Quality, reliability, and flexibility for a successful assay development.

Accelerate your assay development with fast turnaround times and CE-IVD-compliant quality to ensure reliable performance. Our stringent processing guarantees consistent results, while our tailored OEM services help you bring diagnostic kits to market efficiently.

Diagnostic grade oligonucleotides

ISO 9001 & 13485 certified process	✓
Equipment & method qualification	✓
Traceability	Full
Customised filling and formulations	✓
Stringent validated QC tests	✓
QA release of product	✓
Batch record	Full
Certificate of analysis (CoA)	Full

Diagnostic grade plasmid DNA

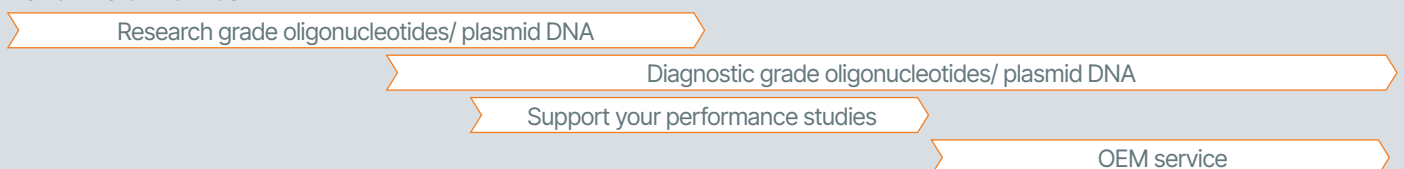

ISO 9001 & 13485 certified process	✓
Equipment & methods qualification	✓
Traceability	Full
Single use material	✓
Laboratory space	Separated lab with line clearance
Sample processing	Single
Batch record	On request
Certificate of analysis (CoA)	✓

We support the entire value chain within your assay development
