Eurofins Genomics Signs Contract to Supply Oligonucleotides to Swedish Research Councils

Ebersberg, Germany, July 15th, 2014 - Eurofins Genomics, international market leader in genomic services, has signed a two year contract with Lund University as one of several preferred suppliers for oligonucleotides on the recently awarded framework contract. The contract builds on a long standing relationship and offers best oligonucleotide prices to Lund University, Gothenburg University, Linköping University and Chalmers University of Technology.

“We are delighted to have been selected as one of the preferred suppliers for oligonucleotides based upon our product quality and the level of service provided”, says Bruno Poddevin, Senior Vice-President Eurofins Genomics. “This contract will ensure that the whole scientist community in South Sweden will have full access to the Eurofins Genomics’ products and services and benefit from our commitment to them.”

About Eurofins Genomics

Eurofins Genomics, a member of the Eurofins Group with facilities in Europe, the United States and Asia, is an internationally leading provider of DNA sequencing services, genotyping services, DNA synthesis products and bioinformatics services for pharma, diagnostics, food, agriculture, biotechnological and research markets. The company's strength is its customer convenience and high quality services in industrial scale for the life science industries and academic research institutions around the world.
